

EGG YOLK LIQUID

SKM Egg Yolk Liquid is made by carefully separating egg yolks from whites, pasteurizing them for safety, and hygienically filled. This process retains its nutritional value and flavour while extending shelf life. It offers convenience and versatility in baking, cooking, and food manufacturing. This guide explores its uses, benefits, and practical applications, unlocking its potential in various endeavours.

Content: 100% Egg Yolk Liquid

Liquid egg yolk undergoes a controlled pasteurization process to reduce harmful pathogens while preserving its nutritional and functional properties. It is widely preferred in food processing, bakery, and sauce applications for its convenience, consistent quality, excellent emulsification properties, enhanced food safety, and reduced risk of microbial contamination.

Capacity: SKM uses only microbiologically tested eggs for breaking and can break 1.8 million eggs a day to produce 7500 tons of finished products in a year.

Raw Material: Fresh eggs are sourced daily from bio-secure farms. Feed ingredients, additives, and compound feed for the birds undergo rigorous testing to ensure compliance with EU and Japanese regulations regarding residues of antibiotics and pesticides.

Quality & Certifications: SKM Egg Products is certified for ISO 22000, BRC, KOSHER, and HALAL to ensure the production of high-quality egg products. Our state-of-the-art Quality Assurance laboratory is equipped with sophisticated instruments and is ISO 17025 accredited.

Applications Industries: Here are some industries where egg yolk liquid finds common use: SKM Egg yolk liquid is a versatile ingredient used in baking, pasta making, processed foods, dressing sauces, desserts and nutrition supplementation. Additionally, it is utilized in biotechnology and research. It adds richness, moisture, and color to various dishes and serves as an emulsifier in recipes.

Egg Yolk Liquid with salt is also ideal for making mayonnaise due to its stability in high temperatures and excellent emulsifying properties. It ensures a stable emulsion even in challenging conditions, such as long-term storage or high temperatures.

SKM Variants - Egg Yolk Liquid:

Product Name	Code
Chilled Egg Yolk Liquid	Y1001
Chilled Egg Yolk Liquid - 11% Salt	Y1002
Chilled Egg Yolk Liquid - 14% Salt	Y1003
Chilled Egg Yolk Liquid - 11% Salt - High Colour	Y1004
Chilled Egg Yolk Liquid - 11% Salt - Stabilized	Y1008
Chilled Egg Yolk Liquid - 8% Salt	Y1009
Frozen Egg Yolk Liquid - 14% Salt	Y1014
Frozen Egg Yolk Liquid - 11% Salt	Y1015
Frozen Egg Yolk Liquid - 10% Salt	Y1016
Frozen Egg Yolk Liquid - 10% Salt - Dark Colour	Y1017

Shelf Life and Storage Condition:

The product, when stored at controlled temperatures (between 0°C - 4°C) has a shelf life of 1 month and stored at controlled temperatures (< - 18°C) has a shelf life of 1 year.

Our Packing:

250g, 500g, 1kg (Packed in tetrapack for household or kitchen usage) 5Kg and 20Kg (Packed in LDPE bag for industrial applications)

Load ability:

Export - 40’ft Container: 24 MT, 20’ft Container: 12 MT Domestic: Based on vehicle and order capacity.
