

WHOLE EGG LIQUID

Pasteurized liquid blend of egg yolk and egg white, formulated for industrial bakeries and standardized ready-meal recipes. Available in both chilled and frozen formats. Whole egg liquid can be used in various applications such as baking, cooking, and food processing. It retains the nutritional content of fresh eggs, including proteins, fats and vitamins. It typically consists of both egg whites and egg yolks, providing a convenient and shelf-stable alternative to fresh eggs.

Content: 100% Whole Egg Liquid

Liquid whole egg undergoes a controlled pasteurization process to reduce harmful pathogens while preserving its nutritional and functional properties. It is widely preferred in food processing, household and bakery applications for its convenience, consistent quality, enhanced food safety, and reduced risk of microbial contamination.

Capacity: SKM uses only fresh eggs from bio secure farms and can break 1.8 million eggs a day to produce 7500 tons of finished products in a year.

Raw Material: Fresh eggs are sourced daily from bio secure farms. Feed ingredients, additives, and compound feed for the birds undergo rigorous testing to ensure compliance with EU and Japanese regulations regarding residues of antibiotics and pesticides.

Quality & Certifications: SKM Egg Products is certified for ISO 22000, BRC, KOSHER, and HALAL to ensure the production of high-quality egg products. Our state-of-the-art Quality Assurance laboratory is equipped with sophisticated instruments and is ISO 17025 accredited.

Applications Industries: SKM Whole egg liquid is a versatile ingredient used in baking, food manufacturing, food service, snack foods, beverages, nutritional supplements, prepared foods, food storage, emergency preparedness.

It serves as a convenient substitute for fresh eggs, providing structure, moisture, protein, and other nutrients. Its long shelf life and ease of use make it valuable in a wide range of culinary and industrial settings.

SKM Variants -Whole Egg Liquid:

Product Name	Code
Whole Egg Liquid - Chilled	W1001
Whole Egg Liquid - Chilled	W1009
Whole Egg Liquid - Frozen - 10% salt	W1008
Whole Egg Liquid - Frozen	W1013

Shelf Life and Storage Condition:

The product, when stored at controlled temperatures (between 0°C - 4°C) has a shelf life of 1 month and stored at controlled temperatures (< - 18°C) has a shelf life of 1 year.

Our Packing:

250g, 500g, 1kg (Packed in tetrapack for household or kitchen usage) 5Kg and 20Kg (Packed in LDPE bag for industrial applications)

Load ability:

Export - 40’ft Container: 24 MT, 20’ft Container: 12 MT Domestic: Based on vehicle and order capacity.
